

## **AVAILON NORTH AMERICA NAMED AUTHORIZED RESELLER OF NRG SYSTEMS' TURBINE CONTROL SENSORS**

(Grimes, Iowa - May 16, 2011) Availon, Inc., a premier provider of parts and services to the wind power industry in North America, is pleased to announce that it has been approved as an Authorized Reseller of NRG Systems' turbine control sensors.

NRG Systems manufactures turbine control sensors and measurement systems for the global wind energy industry. As a result of the reseller agreement, Availon North America will be offering industry proven turbine control sensors to wind turbines owners and operators. These high quality sensors are crucial for optimization and operation of wind farms.

John Boorman, Availon North America Director of Sales, notes: "The phenomenal growth of the wind energy industry in North America presents many challenges to wind services providers like Availon. One such challenge is the need for a dependable, competent partner able to deliver precise, reliable and proven wind measurement and turbine control equipment. NRG Systems is well known around the globe for its innovative technology and integrity. We are particularly impressed by smart technology in NRG Systems' IceFree3 and IceFree Hybrid XT turbine control sensors. Availon North America is glad to be associated with such a company."

"As a global industry leader, NRG Systems carefully selects Authorized Resellers based on their industry expertise, integrity, and alignment with our business philosophy. We are pleased to have selected Availon to join this group of Authorized Resellers for NRG Systems turbine control sensor product line," said Paul Dawson, Global Sales Manager for NRG Systems.

Availon Inc. specializes in parts and services for GE, Vestas®, and Siemens® turbines, and is expanding to other turbine types. In addition to being a primary supplier for SSB and Duradrive parts, Availon Inc. is also an exclusive vendor for Bachmann, Lenord + Bauer, and Convertec parts. The Availon global portfolio includes spare parts supply and management, end of warranty inspections, individual turbine optimization, turbine upgrades, field services, remote monitoring, and operations and maintenance.

***About Availon***

Availon Inc. is a part of the Availon GmbH family. Availon has business units in the USA, Germany, Spain, and Italy. Currently Availon operates throughout North America and Europe, and is expanding into other regions as well.

Availon is the first independent wind turbine service provider to be both ISO 9001 certified and fully certified by Germanischer Lloyd in staff training, troubleshooting and repair processes. By introducing new processes and developing innovative service strategies, the company has managed to consistently increase the availability of its maintained turbines.

***About NRG Systems:***

NRG Systems is an independently-owned company that has served the global wind energy industry for 29 years. Its wind measurement systems and turbine control sensors can be found on every continent in more than 145 countries, serving electric utilities, wind farm developers, turbine manufacturers, research institutes, government agencies, and universities.
