

## **AVAILON NORTH AMERICA NOW OFFERS SERVICE, SUPPORT AND SUPPLY OF PARTS AND COMPONENTS FROM ABB**

(Grimes, Iowa - May 19, 2011) Availon, Inc., a premier provider of parts and services to the wind power industry in North America, is pleased to announce that it will now be offering service, support and supply of low and medium voltage electrical parts and components from ABB - a global leader in power and automation technologies, and the biggest supplier of electrical components for wind energy applications.

Per Steve Thompson, Availon North America President, "This new offering expands our ability to provide a comprehensive range of world-class products to wind power operators in North America. Together with Availon's Parts Management Program - administered from our modern warehousing facility in Grimes, Iowa, - the availability of ABB parts is a winning combination for Availon's rapidly growing customer base."

The ABB low voltage and medium voltage products offered by Availon North America include circuit breakers, switches and other parts and components.
